

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. But aside from these minor discrepancies of speech, it would be wrong to suppose that the language of the Klamath Lake Indians, or that of the Modoc Indians is entirely homogeneous within itself. Every class or cluster, band or settlement of Indians has a few terms peculiar to itself, or some words used in other acceptations than observed among its neighbors; one band may use a derivative of some radix or base in a certain sense, and the nearest settlement may use another derivative of the same origin instead, or pronounce it in a different manner. Should, therefore, a traveler passing through the uplands bordering the lakes of the Klamath River basin not be able to identify at once some of the words given below, this would by no means prove that such words do or did not exist in the language. Besides the terms extracted from the foregoing Texts, there is perhaps not a single word in this voluminous Dictionary that has not been repeatedly verified through Indian informants, and what could not stand this test has been scrupulously eliminated.

Narratives and other texts, correctly worded, yield the most important contributions to a word-collector, and are in every way preferable to the gathering of disconnected terms from an unknown language. I have therefore availed myself fully of the lexical treasures stored up in the historic, ethnologic and poetic specimens obtained from the natives; but, since their interlinear translation cannot, in the narrow space allotted, give in every instance the full import of a term or phrase, a thorough understanding of my Klamath Texts, especially of the songs, implies the unremitting use of the Dictionary. To illustrate clearly and thoroughly the special functions of words, passages from the Texts contained in Part First of this work are adduced as evidence, with their quotation numbers giving the page and line where they occur. Quotation figures separated by commas refer to the Texts in prose; figures separated by semicolons, to the Poetic Texts. The *Notes* explaining portions of the Texts will, in many instances, supplement the definitions of the words as given in the Dictionary.

Before tracing the plan followed in composing this Dictionary, a remark of a more general import may be inserted to illustrate the phonetic character of the language.

The fact that languages of rude and primitive tribes are built up

more regularly and often show a closer observance of logical principles than those of peoples of ancient civilization has often been pointed out, and, so far as it relates to the contrast between inflective and agglutinative languages, can no longer be doubted. Agglutinative tongues are spoken by most of the savage races, and, as to their morphology, show more regularity in their inflections, because the affixes are not so much altered and ground down by phonetic wear and tear as the affixes of inflective languages. This is because in the former languages the mental force binding and fusing the affixes to the root has acted less powerfully than in the latter. The natives still retain in their minds the original meaning of each verbal or nominal affix, whereas this remembrance has been long since obliterated among the individuals speaking inflective tongues; and the regularity of inflections naturally results in the other group from the indiscriminate addition of these to each root or base of the language. A language rich in grammatic forms is usually simple in its syntax.

But in their phonology most agglutinative languages do not show the regularity observed in their grammatic forms. Physical agencies, hidden as yet from our mental eye, produce alternations of the sounds pronounced with the same organ of the vocal tube, which in some of the languages are profuse, in others less numerous. In most North American languages we notice the interchangeability of the surd and the sonant explosives, of the sounds of the labial, lingual, etc. series, of *o* and *u*, of *ā* and *e*, and in the language of the Máklaks the alternation of sounds, of which a table is given below, plays a very prominent part. When a word is pronounced in six or more different ways, as in this language, it evidently should not appear so often in the Dictionary, but on the other hand it would be most unscientific to apply a preconceived, uniform phonetic representative to each of these words. This rule has often been adopted in the notation of other American languages, all terms with initial labial (*b*, *p*, *m*, *v*, *w*) having, for instance, been written either with *b* or *m*. I have in the Dictionary preferred the method of placing at the head of each item *that phonetic form of the word which is most frequently heard*, and of subjoining to it the other, or a few of the other phonetic forms, the order in which they follow suggesting the order of their frequency.

This method is applicable to the preparation of a dictionary; but in writing texts of the language, every word and sound must be laid down as it flows from the lips of the native informant, pure and unaltered. In these languages, every sound of the current speech is, or may be, significant; unchanged by imaginary phonetic rules derived from the study of *literary* languages, every word and syllable should be, as it were, photographed with its peculiar short, long and duplex, clear and obscure vowels, drawlings and stops of the voice, noises and clangs. The law of accentuation, as observed in the language of the Máklaks, sustains this principle in a singular manner; for in this western tongue accentuation is much more a syntactic than a morphologic feature, the position of the accent being very generally determined by the run of the sentence. There are but a few polysyllabic words that never shift their accent.

One of the manifold consequences of following fanciful phonetic rules, often engendered by the desire of using as few types as possible, is the arbitrary suppression in literary publications of sounds existing in a language. Thus the Mohawk dialect of Iroquois is represented to have twelve or thirteen sounds only, while in reality it has no less than twenty-six. Indian texts can convey their full meaning only by accurate phonetic transcription; and when they pass down to posterity in this shape, as a true and faithful monument of the tribe who produced them, others may discover phonetic or other laws of the language which our studies have failed to reveal to our own understanding.

After the absolute form of the word, the Dictionary gives in the majority of cases its distributive form, derived from it by what is called distributive reduplication. When the various phonetic modes of forming the distributive from the absolute form have been studied attentively in the Grammar, the absolute form will readily suggest itself when looked for in the Dictionary, though in some of the more difficult cases indications are given to help the reader in his search. Many *nomina actoris* and other terms occur in the distributive form alone, or are more frequent in this than in the absolute form.

The definitions are presented in their etymologic order, which is the order of their historic evolution. It is true that in many instances the form

or function of the radix is unknown, and then the meanings are presented in the order which seemed most plausible. Wherever it could be done, the radix or base of a derivative is pointed out (except when it is contained in the item just preceding), and comparisons of an etymologic or synonymic import are added at the end of the item, to aid further research.

The proper names found in the language, personal and local, were gathered with special care on account of their linguistic importance, and inserted into the Dictionary. Those among their number which can no longer be explained by the existing words of the language are likely to contain archaic forms, and archaic forms belong to the most valuable materials of which grammarians can avail themselves. American names given to Indian men and women were inserted into the Dictionary, but names of Americans were excluded from it, though mention is made of them in the Texts.

Animal and plant names are mostly derivatives, and the difficulty experienced in analyzing them etymologically proves their high antiquity. A large amount of both were furnished by the informants, though I was often left in the dark concerning their accurate equivalents in the English language. Many bird names have an onomatopoeic origin, and many beasts, especially those pursued by hunters, have several names, varying according to the color shade of their peltry as altered by the seasons, or possessed of one real name and various attributes or poetic epithets. Of a few animals the male bears another name than the female; of a few alimentary plants the eatable portion another than the stalk or tree. I took down as many characteristics of these nameless waifs of the Klamath fauna and flora from the Indians as they could recollect, and on returning to Washington submitted the notes on the animals to H. C. Yarrow, M. D., and to Mr. H. W. Henshaw, the well-known ornithologist; on the plants, to Mr. Lester Ward, and Dr. George Vasey, botanist of the U. S. Agricultural Department, these gentlemen having personally observed these objects during their extensive travels in the great interior Basin and on the Western Slope. The scientific names given in the Dictionary rest on their identification, and where the species could not possibly be identified, the name of the genus at least was entered in following their suggestions.

It is proper to state here that the ancient Modoc country on Lost River and vicinity has a milder climate than the settlements of the Klamath Lake people on Upper Klamath Lake, and that on this account the former country yields somewhat different and more abundant natural products than the latter.

LIST OF SOUNDS OCCURRING IN THE KLAMATH LANGUAGE.

- a as in *alarm, wash*; German, *Mann, hat*; French, *pas, gras, flanc*.
 ā longer sound of *a*, as in *far, father, smart, tart*; German, *schaden, lahm, Fahne*.
 â as in *law, all, fall, tall, taught*.
 ä as in *hat, man, fat, ass, slash*.
 b as in *blab, bold*; German, *beben*; French, *barbe*.
 d as in *dread, did*; German, *das, dürfen*; French, *de, darder*.
 dsh as in *judge, julep, George, dudgeon*.
 e as in *then, swell, met*; German, *schwebt*; French, *belle, selle*.
 ě as in last syllable of *preacher, butler, tippler*; German, *Bücher*; French, *le, je, me*.
 ē as in *they, fade, jade, shade*; German, *stehlen*; French, *chaire, maire*.
 g as in *gig, gull*; German, *gross*; French, *gros, grand, orgueil*.
 ġ lingual guttural produced by bending the tip of the tongue backward, resting it against the palate, and when in this position trying to pronounce *g* in *gag, gamble, again*.
 h as in *hag, haul, hoot*; German, *haben, Hals*. Written sometimes 'h in the midst of words.
 i as in *marine*; German, *richten*; French, *ici, patrie*.
 ī longer sound of *i*, as in *bee, glee, reef*; German, *spiegeln, Stiefel*.
 î as in *still, rim, whim, split*; German, *finster, schlimm, Wille*; when long, it is *i* in German *ihn, spielen*.
 y as in *year, yolk*; German, *Jahr*; French, *yeux*; not used as a vowel.
 k as in *kick, kernel*; German, *Kamm, Kork*; French, *soc, coque, quand*; Spanish, *quedar, quizá*.

- k lingual guttural produced like *g* by bending the tip of the tongue backward, holding it against the palate, and then trying to pronounce *k*, *c*, in *kindness*, *killing*, *cool*, *craft*. The tongue must be placed more firmly against the fore portion of the palate than in the *g*, in order to allow less breath to escape.
- χ* the aspirate guttural in *lachen*, *trachten*, *Rachen*, *Sache*, as pronounced in Southern Germany; not occurring in English, French, or Italian; Spanish, *mujer*, *dejar*; Scotch, *loch*. It has nothing in common with the English *x*.
- l* as in *lull*, *loon*, *lot*; German, *Lilie*; French, *lance*.
- m* as in *madam*, *mill*, *mimic*, *mum*; German, *Memme*.
- mb* as in *ramble*, *gamble*, *nimble*.
- mp* as in *imp*, *sample*, *thumping*.
- n* as in *nun*, *net*, *noose*; German, *nein*; French, *nuire*.
- nd* as in *under*, *quandary*; German, *Stunde*; French, *lande*, *offrande*.
- ng* as in *ring*, *bang*, *singing*; German, *singen*, *hangen*.
- nk* as in *prank*, *rink*, *spunk*; German, *Schwank*; French, *cinquante*.
- nk̄* the lingual guttural *k̄* nasalized.
- nχ* the aspirate guttural *χ* nasalized.
- nt* as in *ant*, *internal*; German, *Tinte*, *Flinte*; French, *crainte*.
- o* short and clear, as in *oracle*, *proxy*; German, *Molken*, *rollen*; French, *monter*, *sotte*; Spanish, *oso*.
- ō* longer sound of *o*, as in *note*, *rope*, *coast*, *close*; German, *Floh*, *Boot*, *roth*; French, *sauter*.
- ö* as in *bird*, *burn*, *surd*; German, *blöde*, *Römer*; French, *deuil*, *cœur*.
- p* as in *pipe*, *papa*; German, *Puppe*; French, *pied*.
- s* as in *sad*, *sale*, *soul*, *smell*; German, *Seele*, *Sichel*; French, *sauce*, *seul*.
- sh* as in *shaft*, *shingle*; German, *Schale*, *schön*; French, *chercher*.
- t* as in *trot*, *tell*, *tiptop*; German, *Tafel*; French, *tour*.
- tch* as in *church*, *chaff*, *choke*; German, *hätscheln*; Italian, *cicerone*; Spanish, *chaparral*, *chicha*.
- u* as in *smooth*, *truth*; German, *Fuss*; French, *loup*, *poutre*, *outrage*.

- ū longer sound of *u*, as in *crude, flume, fool*; German, *Stuhl, Ruhr, Blume*; French, *lourd, sourd*.
- û as in *full, pull*; German, *Flucht, Kluft, Russland*; Italian, *lungo*.
- ü not in English; German, *kühl, Gefühl*; French, *lune, puce*.
- v as in *valve, veer, vestige*; German, *Wolke, Wasser, weben*; French, *vautour, veut*.
- w the *û* before vowels; *water, waste, wolf, wish, wayward*; in German it corresponds nearest to short *u*, not to *w*; nearly as French *ou* in *oui, ouate*.
- z as in *zeal, zone, frozen*; German, *Hase*; French, *zèle, rose*.

The English *x* is rendered by *gs* or *ks*, the German *z* by *ds* or *ts*, all being compound articulations. The two points on *a, o, u* (*ä, ö, ü*) are not signs of diæresis; they mark softened vowels.

The pronunciation of the *diphthongs* may be easily inferred from their component vowels; it is as follows:

- ai as in *life, mine, sly, die, dye*.
- au as in *loud, mouse, arouse*.
- ei a combination of *e* and *i* resembling the vowel sounds in the word *greyish*, united into a diphthong.
- yu or iu as in *pure, few, union*.
- oi as in *loin, groin, alloy*.
- wa or ua as in *watch, wash*; French, *oie, loi, roi*.
- wi or ui as in *squid, win, switch*.

All the diphthongs being of an adulterine character, they can generally be separated into two vowels, and then are hyphenized, as in *i-u, o-i, á-i, a-ú*.

GRAPHIC SIGNS.

- ˊ arrested sound: *skóˊhs, spring time; tchúˊka, to swim up stream*.
- ˊ apostrophe marking elision of a vowel, of *ě* or any other sound: *heshuámp'li* for *heshuámpěli, to recover one's health*.
- hiatus, separating two vowels as belonging to two different syllables: *pála-ash, flour; lěmé-ish, thunder*; or two consonants: *tsiäls-hä'mi, at salmon-time*.

- separates the parts of compound terms: skúks-kiä'm, *spirit-fish* or *letiferous fish*.
- ' acute; the only accent used for marking emphasized syllables
- vowel pronounced long: mū'ni, *large, great*; tchúlēks, *meat*.
- ~ vowel pronounced short, except ǝ, to which a distinct sound is given: yúmāltkǎ, *to return from berry-harvest*.

ALTERNATING PROCESSES OBSERVED IN THE KLAMATH LANGUAGE.

m	alt. mp, p (rare).	wu	alt. vu, u.
mb	alt. b (rare).	z	alt. s (rare).

The sounds *d* and *t* were kept strictly distinct from the palatals *dsh* and *tch* throughout the series of words in which they occur, but words containing the sounds *m* and *n* were left intermingled with those containing *nx* and the nasalized explosives *mb*, *mp*, *nd*, *ng*, *nk*, *nk̄*, *nt*, of which they form components.

V occurs only in the combination *vu*. Words with initial *wu-* are all entered under *vu-*.

See remarks on the diphthongs, Texts, page 12.

Forms included in parenthesis (—) are very unfrequently met with.

The simple sounds susceptible of gemination are as follows: the vowels *a*, *e*, *i*, *o*, *u*; the consonants *g*, *h*, *k*, *l*, *m*, *n*, *p*, *s*, *t*.

From the alternating list of sounds and the rules submitted the finding of a Klamath word in the Dictionary will not, after a few hours of practice, meet with any difficulties. I subjoin a list of instances, which will prove useful to beginners, and have italicized the most frequent form of the word as the one occupying the first or only place in the list of words.

Gé-uni can be pronounced *ké-uni*, *kä'-ûni*, *χä'-uni*, *gä'-uni*, and will be found under *ké-uni*.

Nxílla can be pronounced *kí'la*, *k̄í'la*, *kílla*, *k̄ílla*, *nxí'la*, and will be found under *kí'la*, though in this special instance it is difficult to state which is the pronunciation most frequently resorted to.

The term *támno* can be pronounced *tám'nu*, *dáměnú*, *táměnú*, and will be found under *táměnú*. Other instances are:

huáltoks, *huáltaks*, *wáltaks*, *wáltoks*.

Sá-ad, *Sá-at*, *Sā't*, *Shát*, *Shā't*.

p'lā'ntant, *p'léntant*, *p'lē'ntant*, *plē'ntant*.

DICTIONARY OF THE KLAMATH LANGUAGE.

KLAMATH—ENGLISH.

A.

A, when beginning a word, is usually pronounced clear, as in *barge, large*; it alternates at times, when in the middle of or at the end of words, with *ä, e* and other vowels. This vowel is a component of many radical syllables, as observed in *páha, táměnu, taktákli*, and when serving as a prefix is indicative of one long-shaped article; cf. *adshága, atchíga, átpa*; before a nasalized consonant in *ámnda, áнку*.

a the enclitic particle of the declarative mode of the Klamath verb; it is appended to every verbal base not ending in another vowel or in *-l, -n*, as *ktána to sleep; látcha to build a house*. It then becomes frequently emphasized, especially in such verbs as indicate locomotion, removal, travel etc.: *gúka, guká to climb up; médsha, medshá to emigrate; núta, nutá to set on fire*, 89, 2. **A** occurs also often as a separate word, more frequently so in the Kl. than in the Mod. dialect, and then is usually placed before the verb: *Títak a látcha Titak is building a house*. It is not easily translatable in English, but indicates very frequently *custom* or *habit*, as will be seen by the following instances: *Spú'klish a sha shú'ta kué-utch they construct sweat-lodges from willows*, 82, 2; *tatátaks a híshuaksh tchíměna whenever a husband became a widower*, 82, 4; *tiä'muk a hú'ntsna hungry I fly around*, 177; 21; *pä'p an a nú shä'shatk; nú a gátpa pä'p I am called the marten; I, the marten, am coming*, 177; 10. Cf. 82, 6, 8. 12.; 84, 1.; 87, 4. 10.; 88, 4. In historic narrative *a* is almost as frequent; cf. 22, 19. 24, 21. 29, 21. 64, 9. 68, 4. 70, 9. 120, 11. 140, 2. 5. 6. 11. (an for a nú); 141, 3. 5. When coalescing with other words than verbs, it often changes into *ä* or *ě*: *átěnen* for *at a nen*, 23, 5.; *tánktě nat* for *tánkt a nat*; *tátatěnat* for *tat at a nat*, 24, 19.; *átěnish, átěni*, 90, 12. 13. and Note to 138, 6. 7.; or it becomes emphasized: *tatá* for *tat á, tat há* (this is also interrogative); *tatátuk; aka, aká*, for *ak a, ak ha, ak há*; *uná* for *úna á*; *tidshá*, 189; 5.

a! á! ha! há! Interrogative particle, often enclitic, inserted into questions, and mostly appended to them as the concluding word or standing after the first word. Being a particle of actuality, it refers to the present tense. Shaná-ul' í ámpo a! or simply: ámpu a! *do you want water?* at há pítcha lóloks? *is the fire out?* Mod; Plē'nkamkshí á! *at Frank's house?* 140, 4; ká-itak há í nīsh lóla? *do you not believe me?* Mod.; at há í múlua? *are you ready?* In tatá, 41, 5., it is combined with the adverb táta (táta há!).

a abbr. from at, *now, then*, q. v. 22, 2 21. 29, 19. 30, 3. 31, 13. 184; 37. It is pronounced long.

ā abbr. from the pronoun āt, *ye*, q. v., as nā is abbr. from nād, nāt.

a - a h a h í y a, a refrain frequently heard in shamanic and popular songs. Cf. hahí-íya. Occurs also in Iroquois and other Indian songs, and is of a lugubrious character. 156; 34.

á - a t i, d. of áti, q. v.

á d a k, átak, d. a-ádak *salt*: á. íta, shewána *to put salt on, to salt*. Kl. shūl, shū'l. Only Modoc; it is the Shasti term átak, átaχ, *salt*.

a d s h á g a, d. a-adshága *to play the violin, to fiddle*.

a d s h a g ō' t k i s h, d. a-adshagō'tkish *violin, fiddle*.

Aíshiamtch, "*Old Aíshish*", one of the many mythologic names composed with -amtch, q. v. See also Aíshish.

Aíshish, Aísis, nom. pr. of *Aíshish*, in whom some natural powers were deified in masculine shape by the Máklaks. He is reputed to be the son of the creator and ruler of the world and mankind, the tricky K'múkamtch: 94, 8. 9., 95, 20. He has five wives, whose names are given 99, 9. 10.: Tuhúsh, Stókua, Klí'tish, Wä'ks, Tsí'ka; four of these are the names of birds, and three among them of water-fowls. He associates with men (máklaks), gambles with them, 99, 2-8; and rivalizes with them successfully when shooting at the mark, as reported in his "shashapkéléash" or myth: 99, 4. 100, 20. To judge of his mythologic character correctly, it is important to observe that when he kindled his camp-fire the flames were purple-blue, while those of Silver Fox, K'múkamtch's companion, were yellow, and K'múkamtch's own fire emitted smoke only, 99, 3. 4. His father attempts to destroy him by inducing him to climb a pine-tree to obtain an eagle's nest: 100, 1 sqq., 94, 8 sqq. Famished and almost dead,

he is finally rescued by two butterflies, 95, 13-22., 101, 7-21. K'múkamtch had seduced one of his wives and attempted to seduce the others; Aíshish therefore revenges himself on him by causing his son to throw his (K'múkamtch's) tobacco-pipe into the fire; the death of K'múkamtch was the immediate consequence of this act: 96, 10-18. When K'múkamtch had returned to life, he attempted to wipe out Aísis and his entire family by a general conflagration of the country, 96, 19-97, 2. The Klamath folklore ascribes personal beauty to this deity. Two Aíshish-songs were obtained from a Modoc, 193; 10. 11. and Note. Der. aíshi. aíshishtchi (1) *beautiful, pretty, handsome*, lit. "Aíshish-like". This epithet is sometimes ironically applied to ugly women. (2) subst.: *personal beauty*. Der. Aíshish, -ptchi.

H.

This laryngeal sound, when initial, can be dropped in many words beginning in hi-, hl-, hu- and in a few words beginning in ha-, ho-. When medial, -h- is often dropped, when standing between two vowels; or it stands there to preclude hiatus, as in shanahō'li. When pronounced with emphasis, it becomes geminated, as in kašlha, ka'hha *to miss*. Prefixed or suffixed to the radix, -'h- sometimes means that an act is performed with the hands or extremities (*há by hand*), cf. ge'hlápka, gu'hli, p'hû'shka, pû'l'hka, wa'htákia.

Kíntpuash, *nom. pr.* of the Modoc chief and principal leader in the Modoc war of 1872-1873, called *Captain Jack* by the white population. Through his personal influence upon the younger and more turbulent portion of the Modoc warriors he brought on a separation from the more peaceable moiety of the tribe in April, 1870, and while the latter migrated from Modoc Point to Yáneks, he returned to the old Modoc

country on the California border, Lost River etc., with the other half: 36, 3-8. The first active measures taken by the Government to bring back the runaway Modocs of Kíntpuash to the Klamath reservation from the lands which they had ceded and sold, ended in a massacre of Indian women, children, and defenseless whites, and thus gave rise to the Modoc war: 37, 3-19. Kíntpuash with his warriors and their families retreated to the lava beds, an inaccessible tract of land impregnable by mere assault, set up his "headquarters" in Wright's cave, and resisted all attempts of the American troops to carry his position from January 16 to the bombardment of the lava beds, April 16-18, 1873: 42, 18-43, 2. The progress of the war, which up to April had been exceedingly slow and meager in results, became more active only on account of the assassination of two of the Peace Commissioners, a dastardly act in which Kíntpuash had played the most prominent part: 42, 1-17. After leaving the "rocky cave" and the lava beds, K. with his warriors resisted for a while successfully the regular troops in the engagements on Sand Hill, 43, 6-12, and Dry Lake (or Grass Lake), 43, 13-16. But finally the Indians separated and this ended the Modoc campaign. K was captured June 1, and with five others tried in Fort Klamath, and hung October 3, 1873. In our texts K. is mentioned as Captain Jack, or as: *lakí*, *Mō'dokni lakí* in 34, 3 35, 8. 17. 21. 36, 4. 10. 13. 37, 4. 5. 17. 39, 5-10. 18-22. 40, 2-5. 41, 6. 42, 1-5. 7. 8. 18. 44, 2-8. He was the cousin of Toby Riddle, both descending from brothers, 39, 22. His name is interpreted by "Having the waterbrash", cf. *kídshipka*, a verb of the same meaning, though provided with another suffix; others explain it, though incorrectly, by the Shasti term *kímpi*, as referring to his high, tall stature Cf. *Kā'mpu*, and Notes to 34, 4. 8. 42, 1. etc., especially the Note to 35, 8. Oregonians wrote his name: Kreintpoos, Keintpoos.

K'mukám̥tchiksh, abbr. K'múkam̥tch, K'mukám̥ts, nom. pr. of K'mú-

kamtch, the creator and supreme ruler of the world and of mankind in the mythology of the Modocs and Klamath Lake Indians. His name means: "*the Old Man of the forefathers*", or "*the primeval Old Man*". In him the natives have deified the most powerful agency of nature known to them, *the sun*. As the supreme deity of a *hunting* race, he is invested with all the attributes of certain animals pursued by the Indian hunter: sagacity, cunning, recklessness, gigantic power etc. He also appears under the mask of the sagacious marten (Skélamtch), 107, 1. 3., and as such he is the elder brother of Little Weasel (Tchashgáyak), whom he is sending out from Yámsi, his temporary residence, to obtain one-eyed wives for both, 107, 1-4. 109, 3. 4. K. creates the earth, 104, 4. 125, 1. 142, 1., and gives names to all the localities made by him in the Klamath country, 142, 1 sqq. He creates the human beings, 94, 1. 2.; the races and tribes of men, 103, 1-5. 143, 2-4.; all things upon the earth and the fish in the water, 94, 3-4. In concert with him some animals determine the duration of human life, 103, 6-104, 5. He saves the child of a mother who is in the act of leaping into the fire to destroy herself, and hides it in his leg; from there it is afterwards born miraculously and called his son, Aíshish. During the incessant persecutions of Aíshish (q. v.), K. shows himself as a tricky, treacherous, and low character, as a typical beast-god. In the same light he appears in his dealings with the mother-coyote, 105, 3-16., cf. 132, 1-3. He revenges himself upon the Northwind (Yámshamtch) and the Southwind (Múash, Mū'shamtch) for the killing of his younger brother, by cutting off their heads, a myth describing the final victory of the warming rays of the sun over the rough blasts of the wintry season, 111, 4-11. The extermination of the five Thunders and the two Old Thunders is the symbolization of another meteorologic process, 113, 13-114, 12. From several of our Texts it becomes apparent that in the popular belief K. is not alone regarded as an unapproachable, terrific and demoniac power, but, like the *devil* of medieval Europe, has begun to assume a grotesque and popularly comical character: pp. 105, 125, 126. Being merely a power of nature and not a moral power, the Indians do not pray to him, but worship him in their dances (yékish) only. Two Modoc songs describe his unlimited power over the earth and mankind,

- 192; 8. 9. Being the ruler of the whole world (K. nánuktua né-ulʒa), he will punish bad men (shiktchákatchanuapka kó-idshash hihashuáktchash) by changing them into rocks or by burning them. For the orthography of the name, see 125, 1-9. and Note to 126, 11. 12. Cf. also 65, 11. 131, 2. and in the Dictionary: Aíshish, ámtchiksh, k'mútcha, Ktá-iti, kǎ'k.

K.

The lingual-guttural sound k alternates with the other gutturals in the following order of frequency: χ, k, g, g; in a few instances also with the spirant h ('h-, 'hh-). Modocs pronounce it more forcibly than Klamath Lake Indians, but often elide it altogether when initial, and then substitute the "arrested sound" for it: 'óke for kóke *river*. The sound k occurs at the end of words; when it begins words or stands in the middle of them, it is either pronounced kě-, k'-, or is followed by a vowel. Terms with initial k, χ, g not found here to be looked for under G or K. Some of the vocables below contain the negative particle ká-i as initial syllable. Cf. introductory words to letters G and K.

k á - a k, k á - a g, k ā'k, pl túmi k., *raven: Corvus carnivorus*, mentioned 177;

16. This bird's cry, especially when heard just after sunset, is regarded as ominous, not only on account of its peculiar sound, approaching the voice of man, but also because the raven was seen to devour dead men; cf. 134, 1. 2. The raven therefore became personified in K á - a k a m t c h, q. v.; also called simply K á - a k. Cf. íwam. Onomatop.

K á - a k a m t c h, or K á - a k "*Old Raven*"; personification of the raven with his oracular powers. In three of our mythic stories the cry or "laughing" of "Old Raven" changes men into rocks, a transformation performed by order of K'múkamtch. Cf. pp. 131. 132 with 134, 1. 2. K. wétanta shash *Old Raven laughed at them*, 131, 2. 14. K á - a g, 132, 7. Cf. k á - a k.

Ká-ashkshi, nom. pr. of a locality on the eastern shore of Upper Klamath Lake, about three hundred yards north of Capt. Ferree's house.

An ancient funeral sweat-lodge, K. spúklish, lies there; cf. Note on p. 143.

ká-i, adv., (1) the negative particle *not*. It is used for negating facts or assertions in an *objective* manner, thus differing from *le*, *lä*, *q. v.*: ká-i *tídsi skútash gí-uapka!* *it will not be a good mantle!* 125, 5. Cf. 42, 7. 43, 11. It usually occupies the position just before the word to be negated, and very frequently figures at the head of a sentence, and then is spoken with a higher pitch of the voice: 100, 18. 118, 9-11. 119, 15. 127, 4. 140, 11. 142, 15.; cf. 140, 6., but seldom at the end of such: 87, 5. In English it has often to be rendered by the indefinite pronoun *no*, *none*, *not one*, though in the mind of the Máklaks it remains adverb: ká-i *tatáksni gasáksína* *no children follow*, instead of: *children do not follow*, 87, 7. With many words ká-i forms negative phrases, which we are wont to render by a positive turn of the phrase: ká-i *káгатko* *whole, entire*; ká-i *stínta* *to hate*; ká-i *vú'shish* *brave, bold, plucky*. Among the many compounds of the prefixed ká-i we mention: *kaíxěma*, *kä'gí*, *káyak*, *káyutch*, *kaítua*, *ká-itata*, *késhga* etc. Cf. also ká-i *kaní* under *kaní*. (2) *no!* when used in reply to queries. Such replies are generally expressed by whole sentences: *tám í shléa húnksh?* ká-i *nú húnksh shléa*. *Did you see him? I did not.*

N.

The sound *n* alternates with *l* only, and rather unfrequently; cf. ntchamā'shka. Guttural and dental sounds, though in a limited number of terms only, become nasalized into *ng, nk, nk, nx; nd, nt*; palatal sounds into *ndsh, ntch*. Initial *n*-, followed by a vowel or diphthong, is in a number of terms a prefix descriptive of something thin, flat, pliant, sheet-like, string- or rope-like, or pointing to a motion along the ground, or on the

horizon. Initial nu-, in a series of words, is a radix referring to something round, rounded, or bulky, heavy, moving in the air.

S. SH.

S alternates throughout with sh. Some words are more frequently pronounced with initial *s* than with *sh*, and these I have written with *s*, although both were made to form only one alphabetic series. In the conversational form of language *s* prevails over *sh* before vocalic sounds as well as before some consonants. Dialectically, *sh*, *s* sometimes alternate with *tch*, *ts*: shkú'mla, sgú'mla, Mod.: tchgú'mla, tsjú'mla *to form hoar frost.* The prefix *s*-, *sh*- forms medial and a few reflective and reciprocal verbs, as well as a number of compound prefixes, like *shl*-, *shn*-, etc.

sha, sa, tsa, obj. shash, sas, poss. sham, sam, procl. and encl. pers. pron. of third person pl. anim, *they, themselves*: sha hú'nk tú'kélxa *they stopped on their way*, 131, 7.; at mat sa waslalá *then, as reported, they hunted chipmunks*, 107, 13.; tsí sa hémkank *so they speak*, 58, 9.; kák at tiní'xi tsa *who had just gone up the hill*, 23, 13.: Lemé-ish háshpa shash Skélamtchash *the Thunders handed them over to Old Marten*, 113, 3.; pníutakta shash shlólushtat *he blew them into a whistlestick*, 122, 9.; hûtámsxan shásh *rushing between them*, 42, 13.; Ká-akamtch wétanta shash *Old Raven laughed at them*, 131, 3. 14.; kú-i sham nákúsh shú'ta *he spoiled their dam*, or "the dam to them," 132, 5.; násh wü'ka sham kläkä *one of their babes died*, 77, 3. Sha may form compounds with other pronouns, as hú'dsha, húksha, hú'ktsha, kē'ksha, négsha, and often stands in their stead, as sham stands for hú'nkélamsham in 101, 11. 108, 4. 122, 17. Sha is used in a

sense almost equivalent to the reciprocal pronoun *each other* in 58, 10. 11. 13 sqq. 100, 15.; cf. Note to 58, 10. and quot. under péwa. It is often omitted altogether, when the hearer can supply it by the context, 144, 7. 8.; it may coalesce with the foregoing word, as in tchíssa (for tchí sa) *thus they*, 17, 17.; shûshû'dshapëlish (for shûshû'dshapëli sha) *they rebuilt their camp-fires*, 16, 5.; cf. lû'luagslash 31, 6.; mats, 74, 4.; sê, 82, 4.

T.

T alternates with *d*, sometimes with *nt*, *nd*; cf. Introductory words to the letters D and N. Words beginning with *tch*, *ts* were gathered under a separate heading. The prefix *ta-* refers to persons or to long-shaped things standing upright, and usually occurs in some abbreviated form: *te-*, *tě-*, *t'-*, *t-*. The initial syllables *ti-*, *tin-* and *tush-* form verbs with the signification of *running*, *moving fast*, when more than one subject is spoken of, and are not prefixes, but radical syllables. To some verbs with the radical *ti-* this does not apply. Words with initial *tg-*, *tk-*, *tk*, *tx-* generally express the idea of *one subject standing upright*.

ta, *-ta*, accented *-tá* (1) abbr. of Mod. particle *tala* *none but, just, merely*:

hágga ta shlé-ek! hallo! let me just see it! 127, 3. Cf. *tála* (3). (2) abbr. of the postp. of the directive case, *-tala*. Cf. *tála* (4). (3) abbr. of the particle *tala* *then*. Cf. *tála* (5). Quot. under *hûn*, *shepkédsha*, *wak*.

tádsh, *tá'dsh*, encl. *tads*, conj. introducing a strong and unexpected contrast and answering somewhat to our *in spite of*, *however*, *though*: *tû' hak yû'l'ka K'múkamts; Wanák tads yû'tlansna K'múkamtch's arrow fell this side of the mark, but that of Silver Fox missed the direction*, 100, 21.; *wáltkasha tá'dsh léklepkank they conversed among themselves, but only in whispers*; *unák tá'ds mú'luapěle in spite of that they got ready at an early hour*, 20, 12. It is connected with *ak* in: *kúí t. ak gíug hiétalt nûsh by mere cruelty* (lit. "by acting wickedly") *they will tramp on me*, 104, 1.; with *toks* in: *ná-asht tá'dsh toks nû tû'měna I was, however, informed to that effect*, 140, 6. Cf. 101, 17. 108, 5. 122, 20. 134, 5. 147, 12. Usually *t* stands after the first word of the sentence.

tádsha, d. *tatádsha* *to touch each other while walking*.

tadsí, unmeaning term serving to beat the measure for dancing with short steps, 163; 8. Cf. *té-i*.

They were manufactured of lacustrine grasses and reeds, and are now superseded by flour-sacks bought from the whites. Cf. Note to 74, 10.

tak, -tak, -ták; tok, -tok, -túk, encl. particle of adversative, disjunctive import, conveying the idea of contrast; it is appended to all parts of speech, more in use in Mod. than in Kl., and not always easily translated in English, though it corresponds to *but, however*. (1) Contrast is indicated by it when it is suffixed to the first word of a sentence, the contents of which form contrast to a previous one: tapítak Lémé-ish shúga snáwedsh *but after this the Thunder killed the woman*, 111, 17. Cf. 150, 9. (2) Standing in the principal clause of a sentence it often indicates the future tense, when appended to a verb: tátank iták shéwanash hámenian ish shpunkáktak vúshmush *I will let you have this cow for what you like to pay*, Mod. Modocs place it in the incident as well as in the principal clause in conditional sentences, and connect it in the latter, or in both, with the particle un, ún, q. v.: há í páltak, spúlhitak sha mísh ún *if you steal, they will lock you up*; há nish ún Bóshtin lakí tídash shualaliampáktak, géntak nú ún *agency if the American agent will protect me well, I will go to the agency*, 36, 11. Cf. 36, 2. 3. 75, 9. (3) Emphasis rather than contrast is indicated when tak is appended to pronouns: nú *I*, nútak *myself*: nútak ídashnan (gí) *I take away to keep*, Mod.; mítok *thy own*; cf. 189; 7.; with other parts of speech, taks, toksh is more frequent to mark emphasis. Cf. tádash, taks.

táká, d. tátka, v. intr., *to be sharp, to cut*: Títkām wáti a kúi tákatko *Titak's knife is dull, blunt*; tídash tákatk *sharp, cutting well*.

TS. TCH.

The compound sounds *ts* and *tch* constantly alternate, and, when medial and final, both also alternate with *ds*, *dsh*. The few terms written *ts* seem to be more frequently pronounced so than *tch*. In a large number of words

ts, *tch* alternate with *s*, *sh*, this being sometimes a dialectic change. When this alternation is observed at the beginning of a word, the *ts*-, *tch*- is the medial prefix *s*-, *sh*-. The terms where *ts*, *tch* can stand for *nts*, *ntch*, *nds*, *ndsh* and *kts*, *ktch* are of rare occurrence. A few words often pronounced with initial *ts*, *tch* have to be orthographed *t's*-, *t'sh*- and will be found under T. A prefix *ts*-, *tch*- refers to water and other liquids, to flowing, dripping etc.; cf. *tchi*-.

tch, *ts*-, *-tch*-, *-ts*-, *-ds*, abbreviation appended as suffix to accented words:

- (1) abbr. of *tchá* "now", 112, 2. 5. 8. 13. and Note. (2) abbr. of *tcha* for *sha* "they"; cf. 23, 13. and *tcha*. (3) abbr. of *tchí* "thus", 110, 18. and Note. (4) abbr. of *tchí'sh*, *tchísh*, "too", "also", "and": *gitsgánits and a young*, 23, 13.; *núds*, *núts*, *I also*, 58, 1. 59, 4. 61, 17. 65, 14.; *pásh ámbutch eatables and water*, 95, 15.; *lú'luagslats they also enslaved*, 19, 2.; *há'ts and if*, 60, 10. 21; *tchá'tch then*, 129, 6.; *nánxa ts and some*, 65, 15.

tch a. *tša*-, *-tša*-, *-ts* often stands for *sha* *they*, when appended to a verb, 23, 13.; in 95, 17. it stands either for *sha*, *sha a*, or for *tchish a*.

tchá, *tsá*, adv, *now*, *just now*, *presently*; same as *tchá-u*, q. v.: *tchá at tchí' m'sh nú shéka now I bid you farewell in this way*, 87, 14. Cf. 111, 16.

W.

The sound *w* is used here only before vowels; it never has a labial sound approaching the German *w* or the English *w* in *wear*, *wine*. Terms in which initial *w* occurs before *-u* are written *vu*. Initial *wa-* in some instances stands for the prefix *u-*, as in wapálash, wawíkanka. Verbs with initial *wawa-*, chiefly used in their d. forms, have been inserted under their absolute form in *wa-*.

- wá, u-á (d. wáwa), pl. túmi wá, v. intr., used of a plurality of subjects only: (1) *to dwell, stay, remain in or within*. Cf. wā'sh. Wálamskni, pl. túmi W. (1) adj., *belonging to, coming from Rogue River Valley*, in Southwestern Oregon. (2) W., or W. máklaks, nom. pr., *Rogue River Indian*. These Indians belong, like the Umpqua, to the Tinné family of aborigines; they formerly inhabited the largest part of the country drained by the Rogue River and its tributaries (Illinois River, Applegate Creek etc.), and also held the coast of the Pacific Ocean between 41° 30' and 43° of latitude. They are sometimes called Tototen or Tutatami after one of their tribes, which was settled at the mouth of the Rogue River. When they had been subjugated during the long and bloody Oregon war, the majority of this race and of their allies in war, the Shasti Indians, were removed to the coast reservations, though many still remain in their old haunts and fishing places. Dr. Hubbard, in an article written in February 1856, before their removal and the cession of their lands by treaty to the Government of the United States, fixed the number of Rogue River tribes, each under a chief, at thirteen, and the number of Indians at 1,205. Two episodes of their local quarrels with the É-ukshikni are sketched in our Texts, pp. 16-18. A Rogue River chief is mentioned, 16, 6. sqq. Der. Wálamsh. Cf. Ámpkokni, Sól-tchokni, Tchakä'nkni.

DICTIONARY OF THE KLAMATH LANGUAGE.

ENGLISH-KLAMATH.
•

INTRODUCTION.

The preparation of this second part of the Dictionary of the Klamath Language has been a much more arduous task than would at first appear, and therefore I add a few remarks supplementing those introductory to the Klamath-English part of the Dictionary in order to set forth the principles that guided me in my work.

To be of practical and scientific value, a manual of this kind should be something more than a mere accumulation of the terms corresponding in each language. When several Klamath terms correspond to one English term the reader should be taught which expression must be used in one acceptance of the term and which in another. This discrimination can be made only after a careful examination, based upon practical use and etymology, of the real signification of each term. By thus preventing as much as possible the misapplication of terms in using the language, I have tried to make a fair start toward a synonymy of the tongue which I now introduce to the public. In cases of doubt, however, there must be a reference to the word in Part First under which are given the manifold practical applications of the term.

In the following pages the various Klamath terms corresponding to one English term are introduced by synonymic and idiomatic English expressions in italics, arranged alphabetically, unless, for some reason, another arrangement was found to be desirable. In the case of verbs the equivalents are enumerated in alphabetic order after the preposition accom-

panying the verb. Full information on the equivalents of certain English nouns and verbs of wide and general signification can be obtained only by looking up its synonyms; as, for example,

assist: to aid, help, cooperate.

bad: abject, mischievous, mean, wicked, wretched.

bring: to carry, fetch, haul, transport.

It will be observed that in the Klamath, as well as in many other unwritten languages, there are no single equivalents for such abstract English terms as the substantives *hope*, *hurry*, *love*, *time*, or for the verbs *to cause*, *let*, *prompt*, but there are phrases, locutions, and compound terms by means of which these ideas can be expressed with accuracy.

Compound English words are noticed only when they correspond to simple Klamath terms. Phrases and sentences when wanting in this part of the Dictionary will be found in the Klamath-English part. As to orthography, accentuation, and pronunciation, the Klamath words are written precisely as in Part First, save in a very few instances where circumstances seemed to make a change desirable. Where differences occur between the two dialects, the Modoc term stands after that of the northern, or Klamath Lake dialect.

Names of localities are usually identical in both English and Klamath; therefore a few only—the more important ones—will be found in Part Second. The meaning of many of the Klamath topographic names is involved in obscurity. Of personal names, only those of well-known Indians are recorded as such; others are inserted according to their ordinary signification, as, for instance, the name Hlékosh will be found under *lap*, v. t.

The Klamath terms having the initial y-, which is interchangeable with i-, iy-, are for convenience of reference inserted in Part First immediately after those beginning in i-. In this part, however, the English y, as well as tch, occupies its usual place in the alphabet.

Although many additions have suggested themselves, the author deemed it preferable to restrict himself to the terms given in the Klamath-English part. The majority of verbs, however, can form derivatives of an inchoative meaning in *-támpka*, or *-iéga*, *-éga*, or completives in *-óla*, *-úla*, and other forms, which students of this language will readily understand when

conversing with the natives. They will also readily reconstruct the diminutive form in nouns, when not met with in this Dictionary.

Since Klamath makes no formal distinction between the direct and the the indirect object, which is expressed by our dative case, the terms transitive and intransitive verb cannot mean the same thing in Klamath that they do in English. English intransitives are sometimes rendered by Klamath transitives, and vice versa. In the Klamath language the transitive verb is governed by its object, a rule which can be comprehended in its full import only by a study of the Grammar.

In their prefixes, verbs and their derivatives indicate the form and number of the object acted upon, and intransitive verbs the form and number of the subject. Thus it may be seen from the prefix attached to many terms, whether the action or state refers to one or many, or to a long, flat, thread-like, round, bulky, erect, animate being or inanimate thing. For the sake of brevity, shape and number could not always be referred to in the following pages, hence reference to the section "*Prefixes*" in the Grammar is necessary.

LIST OF PREFIXES.

The most common prefixes, simple and compound, are as follows:

a-	long-shaped object—in the singular number or collectively.
i-, iy-, y-	long or animate—generally in the plural.
k-, ki-	act performed laterally, obliquely.
ksh-, ks-	long or animate object—in the singular or collectively, especially when held in the arms.
l-	round, rounded or bulky object or subject.
n-	thin, thread-like or sheet-like object or subject; also refers to what is seen on the horizon.
p-	proprietary prefix; inalienable ownership.
p-, pe-	long, round, or animate object—generally in the plural number.
sh-, s-	medial prefix.
shl-	object enveloping the whole body.
shu-	object round, rounded, bulky, in a medial sense.
t-, ta-, tē-	subject or object standing erect—singular number.
tch-, ts-	subject or object a liquid, as water, etc.
u-, vu-	long or animate subject, or direct and indirect object standing or being above.
